

Power From The Past

Antique Tractor and Engine Show Will be in Elfrida

**Saturday, May 7th
from 9 a.m. to 4 p.m.**

"Power From the Past" is honored to be comprised of sources of mechanical energy that were used in the home, on the farm, in mining, oil pumping and general industry long before electricity became readily available. The turn of the last century (1800's to 1900's) saw the use of a vast array of engines and tractors powered by steam, kerosene, gasoline and natural gas. These machines brought the power that was needed to make life not only easier, but more productive. Many of these "antiques" still perform their original duties, but others need a bit of attention and rehabilitation before they can "breathe" again.
